- consider using fewer abbreviations for (potentially) less familiar terms like BPPV
- this presentation provided a great framework if I was to treat a patient w/ concussion... Awesome job!
even in the ortho setting

- great slides, just the right amount of wordage
- you did a good job of not reading off slides
- I think that it would've been good to include some more detail about interventions proposed. I feel like this is an area of improvement in our curriculum so some bulleted ideas would have been good, especially for things like vestibular →

Consider audience for this specific presentation - truncating some slides would have been less overwhelming and could have prompted discussion.

try to use "like" less in presenting
info specific to peds?? → a lot of info seemed
more general concussion info vs specific to peds
