

PHYT 854
Capstone Project Feedback

Note: Your input about this student's work will be viewed only by the student's advisor, so feel free to offer suggestions for how the work could be improved in addition to describing its strengths.

Student _____

Date _____

Title _____

Committee member _____

Check components of the project you have been able to view and are providing feedback about:

- Webpage at dptcapstone.web.unc.edu
- Patient education materials (print or web-based)
- Powerpoint presentation (presentation file only)
- Voicethread(s)
- Face to face presentation
- Evidence tables
- Video presentation/files
- Other _____

Please provide feedback about the capstone project in the following areas:

Clear integration of evidence (in addition to CAT)/Literature Review

(comprehensiveness, accuracy, up-to-date, appropriately critical, synthesizes information, derives evidence to guide clinical decision-making):

Project final products:

Quality of communication (clarity, organization, appropriate language level for audience(s), effective use of media, advances knowledge in area)

Clinical usefulness/Need(practicality and value of product for clinical use, recommended modifications, etc)

Outcome/Evaluation component (evaluation form – is feasible for use and guides revision or improvement of the products)

Mechanics:

Communicated appropriately regarding timelines and expectations.

Provided materials with sufficient lead time to allow for feedback

Were you able to share your feedback about the project directly with the student?

If not, is it OK for them to receive a copy of this form? __YES __NO

Did the student respond appropriately to feedback provided?

Other comments or recommendations:

Thanks so much for taking the time to provide this valuable feedback! We depend on individuals like you in the community to ensure that these projects are grounded in real practice and will be useful clinically. We appreciate the time you have taken to assist our students!!!

Sincerely,
Deborah E. Thorpe, PT, PhD
