

Feedback Form for Clinicians

1. Was this presentation clinically relevant to you as a Physical Therapist?
2. What information did you find interesting? Did you learn something new?
3. What aspects of the presentation and/or material would you revise or change to fit your clinical practice?
4. What recommendations do you have for future presentation of this material (ie to other medical professionals, medical students, etc)?
5. Does the patient education pamphlet reach a general audience?
6. Any other comments or suggestions on presentation or material are appreciated 😊

Feedback and comments from the physical therapists who received this presentation are summarized below.

1. Was this presentation clinically relevant to you as a Physical Therapist?
 - “Yes”
 - “100%”
 - “Yes. I work with pelvic patients and those with women’s health diagnoses regularly. I have treated women with breast CA post-mastectomy in various stages of reconstruction.”
2. What information did you find interesting? Did you learn something new?
 - “surgical procedures”
 - “Research & statistics on benefit of regular exercise”
 - “I don’t treat much lymphedema but it was helpful to learn about wrapping vs. compression garments.”
 - “learning more about different surgeries and learning more about lymphedema”
 - “surgical approach and interventions”
3. What aspects of the presentation and/or material would you revise or change to fit your clinical practice?
 - “N/A, info was relevant and helpful”
 - “examples of surgical protocol.”
 - “I thought the presentation was put together well & covered the main topics/issues that would be encountered in PT”
 - “a little more on PT intervention in outpatient.”
4. What recommendations do you have for future presentation of this material (ie to other medical professionals, medical students, etc)?
 - “mainly express to them the benefit of PT to restore ROM/strength of UE’s, improve scar tissue, increase overall strength, endurance, & QOL.”
 - “present to more medical professionals”
 - “I really like the idea of presenting this to medical professionals—even as an overview hopefully it will get them thinking about utilizing our services for better outcomes”
5. Does the patient education pamphlet reach a general audience?
 - “extremely beneficial for patients”
 - “maybe discuss implants versus flaps”
 - “well put-together and helpful information without being too overwhelming”
6. Any other comments or suggestions on presentation or material are appreciated 😊
 - “N/A”
 - “market the PT’s role and ways we can help patients”

- “great information! This is an underserved population and medical professionals can definitely benefit from this”
