Please briefly answer the questions below:

Please discuss the overall quality of the literature review and work on the TEMPO website.

Do you have any suggestions of how the products could have been improved?

Do you think that the materials created are useful for clinicians or other professionals?

What components could have been added to the literature review to make it more useful for clinicians?

Thanks again for all your help with my capstone! Please e-mail this form back to me when you are finished!
