Not satisfied: 0%

Neutral: 29%

Satisfied: 71%

4. How well was the purpose of the presentation communicated?

Not satisfied: 0%

Neutral: 29%

Satisfied: 71%

5. How clearly was the content of the presentation communicated?

Not satisfied: 0%

Neutral: 29%

Satisfied: 71%

6. After attending the presentation, how interested are you in learning further about the topic of barriers to physical therapy care?

Not satisfied: 0%

Neutral: 14%

Satisfied: 89%

7. What did you find most interesting about the presentation?

Respondents found it interesting that both patients and clinicians identified the same barriers to care, and were hopeful that this could that many physical therapists are in tune with their patients. Other people appreciated our analysis of the study's strengths and weaknesses and potential approaches to expanding the research. A few other responses highlighted the emphasis on diversity and access to physical therapy care.

8. What aspects of the presentation could use improvement?

Most of the responses to this question discussed improving my delivery of the presentation or enhancing the quality of visuals to improve overall clarity.

9. Is there anything else you would like to share?

Participants were excited to review the evidence table we created and were interested in the timeliness of the study. Another respondent was hopeful that we could further the research in order to get a broader sample and possibly report results at a national conference such as the APTA Combined Sections Meeting.
