

Capstone Presentation Evaluation Form

Presenter: Courtney Snyder

Topic: Resting State EEG in Early Stroke Rehabilitation

To what extent did the presentation represent the following objectives?

	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
I am able to identify EEG as a neuroimaging tool along with its pros and cons.					
I am able to define concepts of power and coherence related to EEG.					
I am able to demonstrate understanding of how neural activity contributes to behavior.					
I am able to understand what EEG can contribute to clinical practice.					
I am able to relate the applications of what I have learned from the research findings to clinical practice.					

What did you like most about the presentation?

What areas might you suggest for improvement?
